Companion Therapy CTS with SmartCoat™ Plus Technology

smartcoat⁺
technology

Building upon Companion Therapy's industry-leading technology, the CTS system is veterinary medicine's first comprehensive therapy laser system that incorporates revolutionary 3-D animation and SmartCoat™ Plus technology to improve clinical outcomes and consistency of care.

Drug Free. Surgery Free. Pain Relief.

This most advanced therapeutic modality is designed for ease-of-use, consistent and **reproducible treatments** and client education.

SmartCoat™ Plus technology, developed by LiteCure, is the Industry's first technology that defines and administers optimal treatment dosages based on the body type, hair length, skin and coat color of your patient.

No other Therapy Laser has the science behind it, and no other company is as committed to training and ongoing clinical education.

Unleash your practice's potential with the easy-to-integrate CTS system. With this ground-breaking device, LiteCure continues its commitment to manufacturing the most innovative veterinary medical products available.

Companion Therapy Lasers are used by more veterinarians than any other therapeutic laser; the Companion Therapy Laser is the most effective laser in the veterinary market today. Designed exclusively for veterinary practices, the Companion Therapy Laser provides optimal care and enhanced clinical outcomes.

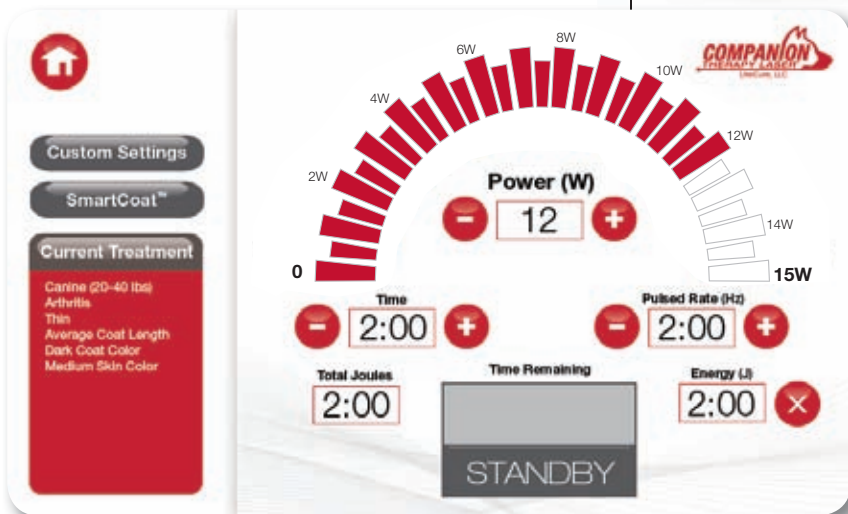

State-of-the-art touch screens with 3-D animation allow the clinician to educate the client about their pet's condition, and to illustrate the benefits of deep tissue laser therapy.

As with all Companion Therapy Laser products, the CTS provides laser therapy solutions for everyday disorders and offers:

- The industry's only patented massage ball hand piece
- Unparalleled clinical support based on the industry's only veterinary-specific research
- In-office and on-line training
- Comprehensive marketing support and client education materials
- Unprecedented customer care

4 Interchangeable, application-specific treatment heads.

Reasons to Upgrade to CTS

User-friendly, **Intuitive** Interface
Comprehensive Laser Library
 Revolutionary 3-D **Animation**
Innovative Technology

LiteCure[®], combining science, technology and education, to increase the quality of veterinary care.

About LiteCure

Combining physics, laser science, and engineering, LiteCure, LLC® is a leading medical device manufacturing company bringing advanced laser technology and innovative solutions to the health care industry.

Located in Newark, Delaware, LiteCure provides expertise in design, manufacturing, production and support. LiteCure provides highly reliable products and the resources and tools to successfully incorporate the technology and products into any practice.

LiteCure is an FDA-registered manufacturer providing FDA cleared products for a variety of medical applications. Each product has been designed and manufactured under stringent quality control systems that are certified to meet ISO-9001 and ISO-13485 standards for medical devices.

With over 10 years of state-of-the-art laser development and manufacturing expertise, LiteCure ensures its customers the best in technology and design. LiteCure employs a highly experienced management team of research and development engineers that together represent over 100 years of experience in the field of laser development and systems integration.
